

Complete Demolition, Dismantling
and Site Clearance Specialist

ABOUT US

Operating Nationally Euro Demolition & Dismantling Ltd offers the construction industry complete solutions to all demolition, dismantling and asset recovery requirements, regardless of the size of the project.

Operationally we hold a wealth of knowledge and experience within our senior management team in delivering highly contaminated and technical demolition projects, including decommissioning and de-planting, bridge removal and explosive demolition.

By utilising innovative methods and using the most appropriate plant and equipment for each project, we ensure the most cost effective delivery programme for our clients.

The site management, operators and labourers are all trained and fully conversant with working on hazardous projects, along with the more traditional demolition operations including industrial, inner city and urban residential to name but a few.

Our workforce are dedicated to providing the highest levels of service within the industry, delivering projects safely, on time (very often ahead of schedule) to the clients complete satisfaction, with as minimal impact to the environment as possible.

Audited and Accredited by CHAS, Safecontractor and Avetta (formerly PICS Auditing), as well as being Constructionline Registered (with a Notation Value of over £1.7M), you can confidently place orders with us, safe in the knowledge that we have all our quality, environmental and health and safety systems in place.

Over the years we have carried out a wide range of technical deconstruction solutions that have included, factories, inner city high rise top down, heavy industrial, residential and petro chemical works to name but a few. Working for large PLC companies, private investment and development companies, we operate in both the UK and Europe.

EXPERIENCE =
SOLUTIONS = SUCCESS

SERVICES

Euro Demolition and Dismantling Ltd are a family run, established demolition and dismantling company. We have provided demolition, dismantling and decommissioning services to many clients, including blue chip companies. We provide an effective, efficient service in the UK and abroad for our clients, providing a complete “Turnkey Solution”, whilst maintaining our high levels of quality, health, safety and environmental standards.

Working in complete partnership with our clients and utilising our vast experience to supply the most practical, efficient machines, project management and labour, to get the job done with maximum efficiency and minimum fuss.

We provide professional appraisals of projects, time scales, contract efficiency and costs.

Euro Demolition & Dismantling Ltd early involvement in the contract ensures that our clients can gain from our experience and ‘know how’ to deliver the safest and most efficient, economical solution to the project.

HEALTH, SAFETY, QUALITY & ENVIRONMENT

The prevention of injury and ill health and maintaining a first-class safety record leading to real performance improvements, are key elements of our approach to managing safety. Caring for the safety, health and well-being of our employees and everyone affected by our activities is of critical importance to us.

With our own dedicated HSEQ Manager and an exceptional record in safety, you know you are in safe hands with us.

Our safety culture means that all staff accept individual responsibility for the health and safety of themselves and their colleagues. Aside from the legal requirements, we believe this behaviour is fundamental to a safe working environment.

Our approach has been to impress on all our employees that safety is the most important part of anything we do.

This approach includes:

- Protecting employees and the public from exposure to risks.
- Assessing risks and avoiding hazards by changing our working methods and suggesting changes to design.
- Controlling risks by providing information and techniques to enable those managing or undertaking the works to reduce their effects.

As a core commitment of the company for continual improvement Euro Demolition & Dismantling Ltd is currently in the process of setting up ISO9001 and ISO14001 integrated management systems for health and safety, environmental and quality to the new ISO 2015 standards (UKAS accredited), which will be in place before the end of 2016.

- Removing a redundant green waste trommel screening barrel from within a live working facility located in West Malling, Kent.

TESTIMONIALS

Testimonial 1

I would like to thank Euro Demolition for the work it has carried out on our Cowley Hill Site this year.

The work recently carried out was the complete demolition and site clearance of a redundant public house on our site boundary but also one of our main site access points.

The work was completed on time, with safety being the main criteria, by an excellent team of contractors. In particular, I was impressed by the professional approach to Health & Safety displayed by the Project Manager. This work required close supervision and great machine skills due to the building's close proximity to the public highway.

The demolition required careful planning and involved the local authorities with the closure of the pavement during the demolition process. Euro has displayed a very high regard to all Health, Safety and Environmental issues and we are currently in tender discussions with them for further potential projects.

Senior Production Engineer

Testimonial 2

I wanted to drop you a brief note to thank you and your team for manner in which you undertook the above works at our Blaise IVC facility.

From the project-planning phase, through to implementation and completion I have received only positive comments from my team as to how Euro Demolition & Dismantling Ltd went about this project. Your attention to health & safety matters is commendable, whilst the practical implementation of safe working practices was a credit to the your team undertaking the works.

I can confirm that the work of EDD both met and exceeded my expectations for the project and I would be pleased to provide a reference to this effect should it ever be required.

Company Operations Director

Testimonial 3

Euro Demolition recently undertook the demolition works for the Former Ardagh Works in Merthyr Tydfil for our company.

I found Euro Demolition is a very competent company whose management team were most professional and informative.

We will no doubt be using their services for future works.

Property Group Estates Manager

OPENCAST MINING OPERATIONS

Euro Demolition & Dismantling are very experienced in open-cast mining operations.

For several years we have been contracted to supply crushed and selected materials for our client's factory. Developing an operational quarry, without any break in supply. We carry out a fully self sufficient operation, including removal of rock and ongoing restoration of their site.

The requirements of the project include, blasting of rock, loading and stockpiling for further processing, including; sizing, removal of impurities, primary and secondary crushing and screening, followed by hand picking to rigorous high specification demanded by the client.

The materials are then loaded on to the client's vehicles for transport the various sites.

Brief Overview of Works

- Full Site Management
- Top Soil / Sub Soil Removal
- Overburden Removal
- Drilling & Blasting
- Rock Extraction, Sizing and Hand Picking of Finished Product
- Road Delivery of Finished Product
- Full Site Restoration.
