

## CASE STUDY: HONDA LOGISTICS, SWINDON

**PROJECT:** *Factory Strip out*

**LOCATION:** *Swindon*

**CLIENT:** *Honda Logistics (UK)*

**CONTRACT DURATION:** *4 Weeks*

Following detailed appraisal and proposal Euro Demolition and Dismantling were awarded the contract to remove a super-sized tyre and wheel bay due to the site closure.

These works included the removal of a super-sized tyre fitting machine, high level controls, cabling and lighting including that of all conveyor systems through to safety barriers and spare parts facility, whilst maintaining a live fully serviced factory.

Within our remit was the safe removal and disposal of all "F" gases, oil and lubes.

High standards of recycling rates were achieved with minimum levels of general waste removed from site. This was further enhanced by the sale of certain roller conveyors to a national recycling company. These up cycled conveyors are now used within a fabric recycling facility in the midlands.
